TOWER SILOS: HIGH PROFIT STORAGE FOR HIGH ENERGY FEEDS

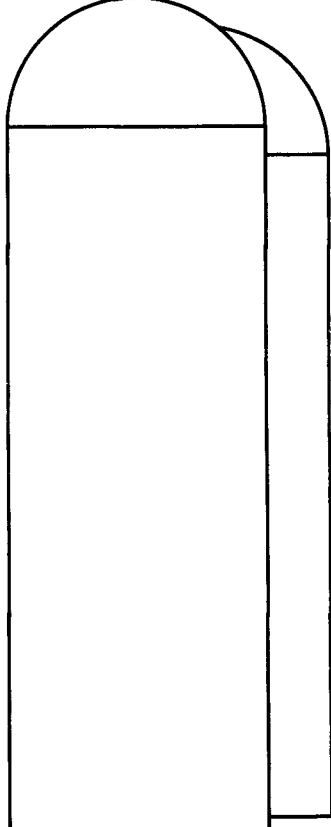

Preserving high energy corn silage is obtained only through efficient, effective storage. Storage that saves the most nutrients. Storage that delivers the highest overall long term benefits. Storage that offers better total performance than any other method of preserving valuable corn silage.

Tower silos control the fermentation process and retain the most feed. With tower silos you'll get better feed...more feed...with lower overall costs and less labor than any other storage method.

"When it comes to high profit storage for high energy feeds, other systems just don't measure up."

For more facts on tower silos, contact YOUR LOCAL SILO COMPANY or:

International Silo Association
