Two thumbs up!

MF Dynashift™ transmissions are getting rave reviews in every field they enter.

On the one hand, it's a smooth, productive powershift.

Your left hand controls a 4-speed powershift transmission for smooth, clutchless shifts under load and outstanding productivity

On the other hand, it's an efficient, reliable manual transmission.

Your right hand controls an 8-speed synchronized transmission with synchronized forward/reverse shuttle for outstanding fuel efficiency, maneuverability and low cost

Together you get the absolute best features of both transmissions - a tractor with 32 forward and 32 reverse speeds that's more productive than a manual shift and more economical and reliable than a powershift. Test drive a Dynashift transmission today on one of these outstanding MF tractors
