CONSIDER THE MANY CONCRETE ADVANTAGES!
"A GOOD JULY RAIN GROWS A LOT OF GRAIN!"
 With The Prospect Of A Good Corn Crop, It's Time For
 Many Producers To Make Decisions Concerning Storage.

In order to avoid hauling and drying costs,
 let us build a corn storage unit to preserve your
 valuable grain at 20%-30% moisture.
 To keep your stored corn bright and yellow,
 you must protect it from oxygen and heat. Our
 6" thick concrete walls reflect 38% of light
 beams, resulting in 780 times more heat-
 resisting ability than steel, and 25 times more
 insulating power than steel.
 Our 6" thick walls have a very low leak
 potential compared to pre-fab silos of any kind,
 and a very low maintenance requirement.
**BEFORE SPENDING A LOT OF MONEY
 FOR ENERGY TO DRY YOUR CORN,
 YOU WILL DO WELL TO CONSIDER THE
 MANY ADVANTAGES OF OUR POURED
 CONCRETE SILOS...**
 To unload your corn, we can install the simple
 auger system, the Laidig 43 unloader, or the
 Flying Dutchman. Let's discuss the options,
 and what is best for your situation.

 16'x68'
 about 10,000 bu. cap.
