

# OMEGA Parallel Parlor Is Here

Above shown with optional stainless steel shroud

## INTRODUCING WESTFALIA'S NEW PARALLEL STALLS FOR INCREASED HIGH-TECH DAIRYING EFFICIENCY

### The New Omega Parlor Stall System

The Omega Stall is a modular parallel system featuring a standard back end that gives you the option of choosing the front ends that best fit your milking style. All Exit Front ends available: swing out, swing up and out, and vertical lift. Each can be installed in a surprisingly small space. The swing out and swing up and out versions can be installed in parlors with 8' ceilings; and, the vertical lift version can be installed in parlors with 9'2" minimum ceiling heights.

Your milking parlor is where the payoff for all your hard work happens. And you want it to be comfortable. Comfortable for your cows so they can do their best at giving you all their milk. Comfortable for you and your operators to make the job of harvesting milk as easy and safe as possible.

That's why the parlor stalls you choose may be the most important facet of your milking operation. And that's why Westfalia has taken the time to develop the finest line of stalls available anywhere.

CIRCLE NO. 1 ON THE ACTION CARD FOR INFORMATION ABOUT WESTFALIA'S OMEGA STALL SYSTEMS

• **Gang Exit** — 4, 5 or 6 cow exit to release cows as they are milked out (Swing up and out style only)

### Westfalia Provides FREE Parlor Planning Service

No matter what the size, shape or configuration of your current facility, Westfalia can design a new floor plan to exactly meet your needs. Give us your specs and we'll take care of the rest. See what your new parlor will look like before making your final decision.

Plan a visit with your Westfalia Sales Center. They'll show you how a new Westfalia parlor system can make a real difference in your milking operation. Talk with them about the Omega System shown here, or the Herringbone and Autotandem parlor stall systems, which are also available.

Westfalia Omega Stalls offer dairymen a wide array of benefits designed to deliver increased dairying efficiency for generations to come

- **Suspended Stalls** — for easier clean-up after each milking.
- **Gravity Close Sequence Gates** — cover 100% of the stall . . . prevents short loading to assure parlor is filled for each cycle.
- **Built-In Power Indexing** — assures access to udder for easy milker attachment.
- **Hot-Dipped Galvanized Front Structure** — with stainless steel butt shield and gutter, ensures longer stall life
- **Built-In Kick Resistor** — for better safety and greater strength to break in those first-calf heifers.

- **All Exit** — release all cows at once for faster cow thru-put
  - **Parlor Appeal** — streamlined appearance enhances the overall operating environment
  - **Stainless Cantilevered Curb** — allows for installation of milk and wash lines under the curb for easier clean-up and operator movement.
  - **Optional Stainless Steel Shroud** — to enclose pulsator, clean air and wiring lines. Makes cleaning of parlor easier.
- FRONT-END OPTIONS**
- **Individual Manual Gate Opener** — for emergency cow release. Allows for individual treatment of cows (Swing out and swing up and out styles only).
