**CEILING INLETS**

Each unit provides 1.2 square feet of intake area and is designed to operate under negative pressure. Inlets are constructed of fiberglass composite and Styrofoam. Units measure 16.5" square and mount directly into the ceiling and project into the attic. An insulation-stop is provided. Stainless steel counter weights and a manual lock adjustment make it unsurpassed in performance.

AP-7DWF	14	25 1/4"	31 1/4"	70 1/4"	588 lbs

All models come fully-assembled

**FEED BINS GSI**

We assemble, deliver & set-up bins on your farm.

**Ground controlled fill caps**

Opening and closing of the fill cap is made easy by our spring loaded, Auto-Lok ground control. Offered as a standard tank feature, this factory assembled control has a single chain to operate the entire opening, closing, and latching process. In the open position, the lid lays parallel to the ground to insure ease of filling the tank, along with eliminating the possibility of damage from the fill auger. In the closed position, the lid is automatically and securely locked down by the gravity assisted, positive latching mechanism.

An alternative to this package includes a manual hold-down latch and a sealing gasket for use with a pneumatic fill system.

**Models Available:**  
 Your Choice Of 6, 7, 9, 12 and 15 Ft. All Galvanized Kopper-Bottom Bins
