

Make 1994 A Holiday To Remember

Workshop participants admire the handmade jewelry by Judy Felck, right.

(Continued from Page B14)

CHRISTMAS WREATH

20-inch pine wreath (artificial or natural)

- 2 stems artificial ivy
- 3 stems berries
- 5 full pieces preserved cedar
- 4 stems latafolia or other filler flower branches
- 6 yards 2 1/2 -inch wide ribbon
- 2 yards 1/2 -inch wide ribbon for bells
- Small amounts of Spanish moss and twigs
- Red bird
- 5 large gold jingle bells
- Florist's wire

Make bow with five loops on each side that are each five inches long. Cut the tail ends with the end of the loops. Tie the bow with ribbon cut 20 inches long, pulling one end up and the other end down. Leave these ends long and cut in a v-shape.

Wire and glue the bow onto the top center of the wreath.

Cut a 17-inch length of ribbon and glue one end under the bottom of the bow. Cut a 10 inch length of ribbon and glue one end under the bow on the right side. Cut another length of ribbon 10-inches long and glue one end under the bow on

the left side. Cut all ends to a v-shape. If you are using wire ribbon, you may curl the ends around a wooden spoon handle and gently pull to loosen. If you are not using wired ribbon, you can get a nice look by tucking the ribbon into the wreath at different spots and gluing in place or leave the tie ends long down the center of the wreath.

Glue in the stems of latafolia and cedar on each side of the bow. Be sure to push the stems in far enough to secure.

Glue the stems of berries on each side of the bow. Cut the berries in clusters if you want some

short ones near the top.

Cut a few leaves off the bottom of the stems of ivy to use later. Glue the remaining stems of ivy under the bow on the top and another under the bow on the bottom. These may be bent around to achieve the desired look you want.

Cut the ribbon for the bells in five different lengths: 15", 13", 11", 9", and 7". Tie a bell onto the end of each ribbon with a slip knot. Arrange the bells in a cascade that is pleasing to you. Tie all the ends together in a single knot on top of

the ribbons and then wire them to the wreath under the center of the bow.

Tuck in the twigs and remaining ivy leaves where you think they fit in best and glue in place.

Make a little nest out of Spanish moss and glue on top of the wreath to the left side of the bow. Place a friendly little bird into the nest and glue securely.

Hang this wreath on your front door. The gold bells will sound a friendly jingle as the door opens to welcome guests.

Lunch break offers an opportunity to garner ideas at the display tables.
