Rhino  
Rhino disc mowers feature an easy access exterior. The innovative design of the exterior allows access to the disc springs and gear media without the safety of the entire exterior, reducing maintenance costs and downtime. The hooded tank guards are designed to help protect the entire leading edge of the exterior from damage and along with the skid shoes are easy to replace. A heavy-duty CAT 111 & Cat 11 offset three-point hitch made of 4" thick steel tubing is standard to provide dependable service. A safety brake system is built in to provide maximum protection against sudden stops when mowing. With 5" of blade overlap and blade tip speed of 13.814 FPM, Rhino disc mowers provide a clean, smooth cut. Pugged suspension and high performance are two reasons Rhino disc mowers are the ideal choice for fast, efficient grass mowing.
