(Continued Next Week)

MANURE HAPPENS!

Badger Northland's rugged, reliable spreaders work as hard as you do.

Two models of hard-working manure spreaders available up to the large 355 cubic foot capacity model BN3352 include these features:

- **Aggressive Beaters** - takes punishment from frozen chunks and provide uniform spreading at the same time.
- **Strong Steel Understructure** - the steel angle cross members and frame rails will give you many years of service
- **Six Apron Speeds** - apron drive eliminates jaw clutches.
- **"V" Belt Beater Drive** - cross drive provides built-in slip clutch. Belt servicing is easy with front mounted shaft bearings
- **Hydraulic Drive** - assures longer life to the PTO and front "V" belt
- **Superslick Deck** - 3/4" fir plywood core coated with fiberglass with resin impregnated gelcoat makes clean-out easy
- **Top Beater (optional)** - allows for more uniform spreading and increased capacity
- **Litter Pan (optional)** - prevents material from falling out below the beaters and falling over the endgate during transport
- **Splitter Valve (optional)** - makes it possible to operate both the hydraulic apron and endgate with only one tractor remote hydraulic circuit
- **Endgate (optional)** - protects beaters during loading and prevents manure from resting on the beaters during transport

Badger Northland Inc. reserves the right to change design and specifications of its products without notice or obligation. Some equipment displayed in this literature may be shown with shields removed for photographic purposes only. Never operate equipment without all shields in place.
