Every grain opened up

The high quality of corn forage produced by the JAGUAR is derived from the CLAAS corn cracker. Two saw toothed rollers run at different speeds with 20% difference open up virtually every kernel and this means good quality silage which is easily digested. This makes for highest energy transfer for higher milk and meat yields. The rollers are subject to wear and tear, so the CLAAS corn cracker features removeable outer sleeves. The shafts, drive pulley and bearings are all reused, thus reducing maintenance costs. Foreign bodies pass through thanks to a spring loaded mechanism.

CLAAS

Leveling your hills.

The optional Hillside Cleaning System automatically swings the top sieve sideways, against the slope of the hill. This keeps grain spread out evenly for cleaner grain samples. You get full performance on slopes up to 20%, without the big expense of a hillside combine.
