SUB-SOILERS

The husky, curved shanks of the Sub-Soiler dig down as deep as 16 inches, shattering compacted layers of plow sole and lifting the hardpan while it is being broken. 3, 5, 7 shanks.

3-SHANK DEEP TILLS

The three shank model, shown above, has a Category II hitch. With a cutting width of 7'6", it is ideal for operators with smaller acreages and horsepower. It is extremely maneuverable, yet provides the same basic deep tilling job as its "big brothers". Available with coulters.

COMPACTION COMMANDERS NO-TILL RIPPER/DEEP RIPPER DESIGNED FOR YOUR CONSERVATION NEEDS 3-5-7 Shank

Brillion introduces their new Compaction Commander...designed to break up hardpan and compaction as deep as 20". The standard V-shaped alloy point and wear strip leaves residue on the surface with minimal soil disturbance. Auto-rest shanks with 20" of trip height allows for non-stop tillage. Parabolic shanks lift and fracture the soil. 39" of underframe clearance assures trouble free operation even in heavy residue.

They are designed to cut residue and work the ground to a depth of 6". The Landcommander has the ability to till from 8" to 20" deep. The rear disc gang has 20" x 7 ga. disc blades on 7.5 spacing. The 6"x4" mainframe is designed to handle the stress from the deep till shanks and disc gangs.
