**Kuhn GMD "100 Series"
Disc Mowers**

Cutting Edge Technology

- In 1968 Kuhn started a revolution in the way grass is cut with its GMC 4 Disc Mower. Now history repeats itself with the introduction of the GMD "100 Series" lineup. It's simply the best mower in the world!
- **EXPERIENCE IS THE BEST TEACHER** - Over 25 years of research and planning produces the best disc mower available.
 - **REDESIGNED CUTTERBAR** - For better overall performance and a more uniform cut.
 - **EASIER MAINTENANCE** - hardened steel components. Simple to remove for quick servicing.
 - **WORKING WIDTHS** - GMD 500 6'7", GMD 600 7'10", GMD 700 9'2"

Cut and dried.

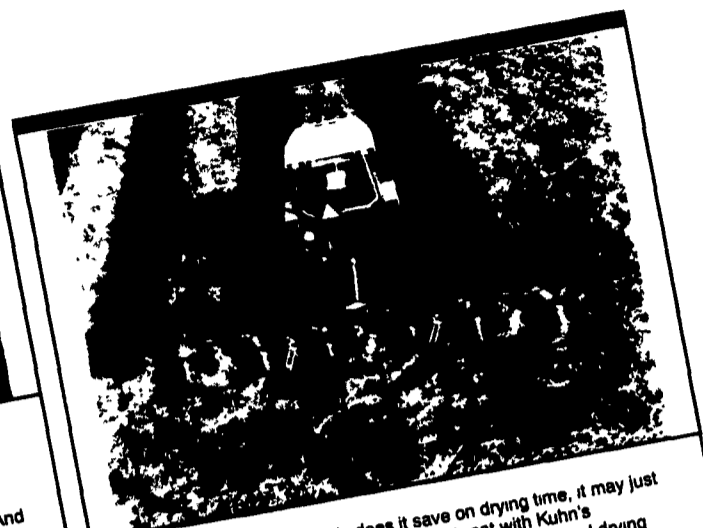

Kuhn's FC series Mower Conditioners - faster cutting, faster drying, better hay. But what else would you expect from the recognized worldwide leader in mower conditioner technology? Kuhn applied over 180 years of research to build a mower conditioner that cuts quicker (7-8 m.p.h., 6-7 1/2 acres/hour) and requires less dry down than many other systems on the market. And Kuhn's FC series is easy on your crop. With a choice of finger comb or roller conditioning, you can match your crop type for even and gentle conditioning with less nutrient loss.

• **Easy to operate and easy to maintain.** Kuhn is the only manufacturer to design a cutter bar exclusively for mower/conditioners to ensure longer life.

• **Three hitch types available to fit your pocketbook.** The GT and Gyrodine® Hitches allow tight 90° turns while providing longer driveline life.

Kuhn's got just the right conditioner for you. Available in the following sizes: • 6'7" 3-point model
• 8'2", 9'10" and 11'8" pull-type models

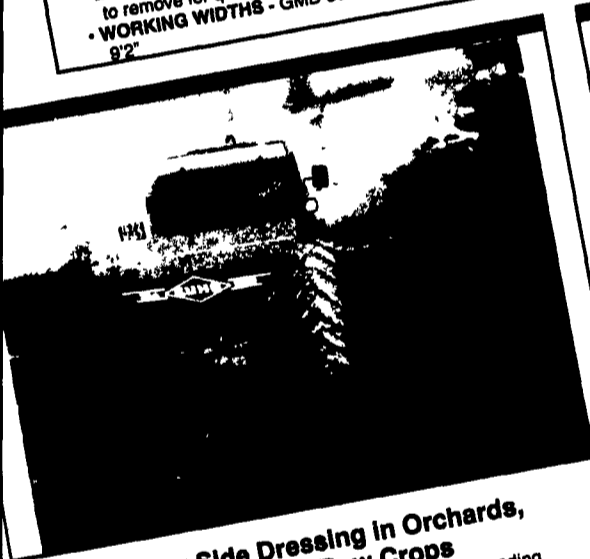

Kuhn's FC series of Mower/Conditioners are the answer to producing a superior crop. Check them out at your Kuhn Dealer today!

Kuhn's Gyrotedder - not only does it save on drying time, it may just save your crop. Wet weather is less of a threat with Kuhn's Gyrotedder since its fluffing action speeds up hay's natural drying time.

The Gyrotedder's articulated frame offers maximum maneuverability. Wheel heights adjust without the use of tools, adapting rotor angle to crop density. And 3-point folding models are equipped with a Digdrive® multiple finger coupling that helps prevent machine damage.

Check out Kuhn's Gyrotedder today! Eight models available in 10' to 28' widths.

Ideal For Side Dressing in Orchards, Nurseries or Row Crops

Kuhn's high-speed, twin disc spreaders feature even spreading patterns, quick cleaning hoppers and stainless steel bottoms. Available with optional easy-to-operate hydraulic shutter controls.

COMET ZSA SERIES

- Hopper Capacities - 1,400 to 2,400 lbs
- Working Widths - 32' to 49'
- Banding Attachments - Optional 2, 4 or 6 row

A turn for the better.

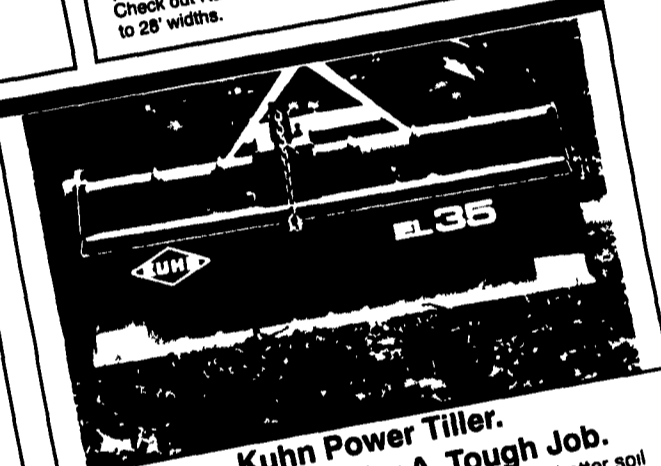

Kuhn's Gyrorake turns haymaking upside down with the 3-in-1 rake, windrow inverter and tedder. Windrow inversion is an essential process that not only allows hay to dry faster, but also decreases leaf loss as it increases nutrient levels. Get the job done fast with a Kuhn Gyrorake. It lets you match rotor and ground speeds to your crop conditions for gentle, efficient inverting.

But when it comes to Kuhn Gyrorakes, windrow inversion is just part of the story. The GA series offers gentle, high speed raking without roping. Side delivery enables you to double windrow. And if needed, the Gyrorake also is an effective tedder for fluffing and drying hay.

Kuhn Gyrorake is also available with special features to make the job go easier and faster. Wide flotation balloon tires (standard equipment) reduce ground pressure for more gentle treatment of crop stubble. Optional bogie axle tames the roughest ground.

The Kuhn GA series of single rotor rakes is available in working widths of 10'6" to 13'. And for really big operations, there's the GA 7301 Twin Gyrorake with adjustable working widths from 21'4" to 24' for raking up to 17 acres per hour.

Kuhn Gyrorakes - taking a turn for the better so you'll turn out better hay.

**Kuhn Power Tiller.
A Tough Tiller For A Tough Job.**

The Kuhn Power Tillers are "user engineered" for better soil management and bigger yields.

- **DURABLE** - heavy-duty blades, enclosed drive line and rugged gearbox take shock loads and resist wear
- **NO MAINTENANCE** - all gear construction eliminates chains, sprockets for maintenance-free operation.
- **CHOICE OF SIZES** - for 12-200 h.p. tractors in 6 working widths from 30"-120"
- **VERSATILE** - perfect for landscaping, nurseries, commercial gardening, orchards, and crop residues
