Built to go the distance

Deutz-Fahr GP round balers are tough. They're built for productivity in the heaviest forage or residue crop, from haylage to corn stalks.

A wide open throat, and full width 58" pick-up with four rows of double tines, spaced at a narrow 2 1/4", pave the way for positive feeding, without plugging. Slick grasses flow through with the same straight forward efficiency as the heaviest swaths.

Power driven ribbed profile steel rollers - 17 on the GP 2 30, 22 on the GP 2 50 - compress material from the outside in, forming extremely dense, weatherproof bales. Smooth bales that keep their shape and preserve quality.

Faster, tying-faster baling. The automatic twin arm tying system reduces binding time to 14 seconds. An optional netting attachment wraps the bale with net, twine, or a combination of both. All functions are monitored from the comfort of your tractor seat with a control box that uses visual and audible signals.

GP 2 30 for easy to handle 4'x4' bales from 500-700 lbs (hay)
GP 2 50 for solid 4'x5' bales, weighing up to 1000 lbs (hay)

Either way, there's a reliable Deutz-Fahr round baler to match your tractor power, and your feeding and storage operation.
