JAMESWAY DIRECT X PRESS SYSTEM

NEW BELT FEEDERS & CONVEYORS

Big Capacity Delivery...
With All The Advantages Of Dependable, Efficient, Low Profile Direct Drive Design!

That's what farmers really appreciate about the new Jamesway family of Direct X Press Feeders and Conveyors. All models feature a dependable and efficient heavy duty industrial drive, with an enclosed oil bath and standard 1/2 or 3 HP C faced motors. Our direct drive design eliminates pulleys, jackshafts, sprockets, chains, V belts and shields. The low profile motor and drive can be mounted on either side for added installation versatility.

The Direct X Press family includes:
• DXF 1400 - Single or Divided Lot 14' Wide Belt Feeder 180' Maximum Length
• DXC 1400 - 14' - Wide Belt Conveyor 180' Maximum Length
• DXC 1800 - 18' - Wide Belt Conveyor 180' Maximum Length
• DXC 2400 - 24' - Wide Belt Conveyor 124' Maximum Length

"X" Sides Are Standard
All Direct X Press System models feature heavy 16-gauge weather resistant galvanized steel sides in 2 1/2' 5' and 10' sections. We call them "X" sides because they are "X-tra" strong and will span 20' between supports. And they are built to last and will stay looking good "X-tra" long!

Do It Your Way!
Match your loading layout and requirements with reversible elevating conveyors, inclines and declines without sacrificing capacity, speed and uniform delivery. All inclines and declines are infinitely adjustable up to 30 degrees elevation for textured belt and up to 15 degrees elevation for smooth belt.

Tough 1/8" thick polyester belt with PVC covering and dependable stainless steel industrial splice is a year round performer and flexes in sub-zero weather. Choice of smooth or textured belt for conveyors in 14', 18' and 24' widths. Belt speed is 230 feet per minute.

"IT IS TIME TO ONCE AGAIN GET SERIOUS ABOUT STORING YOUR VALUABLE FEEDS!!!"

The recent "innovations" and temporary methods of storing your grains and forages are just not protecting your feeds like they should, nor are they really efficient.

Research and practical experience has shown that "the lower silo has never been equalled in its ability to protect your forage quality." And remember... "on most dairy farms, forage quality is the single most important factor affecting profit."

Contact us soon to be sure you get on our schedule to have your poured concrete tower silo constructed in time!
