

DR. NATE SMITH

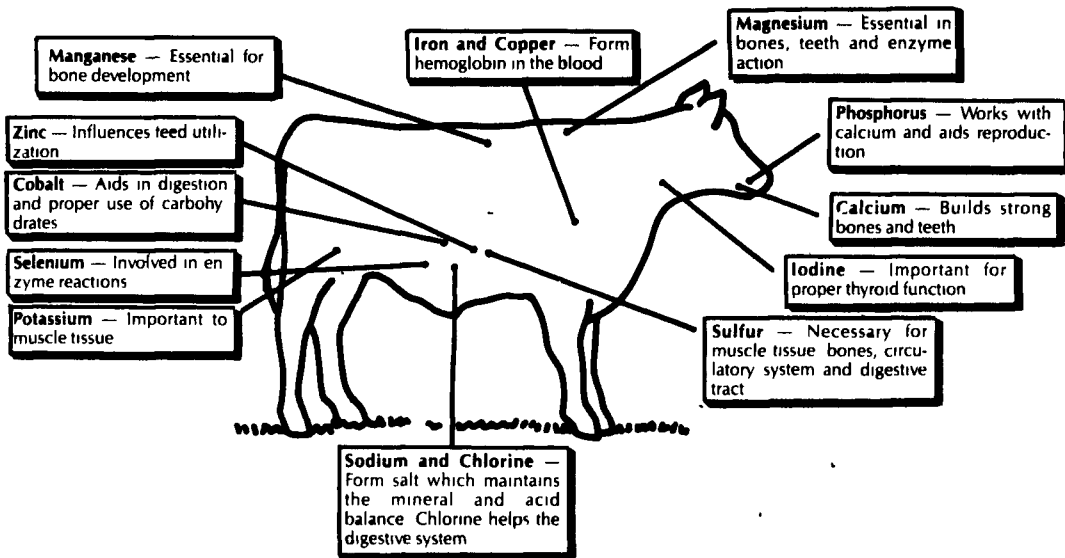

ON THE USE OF

PURINA DAIRY SUPPL-MINERALS

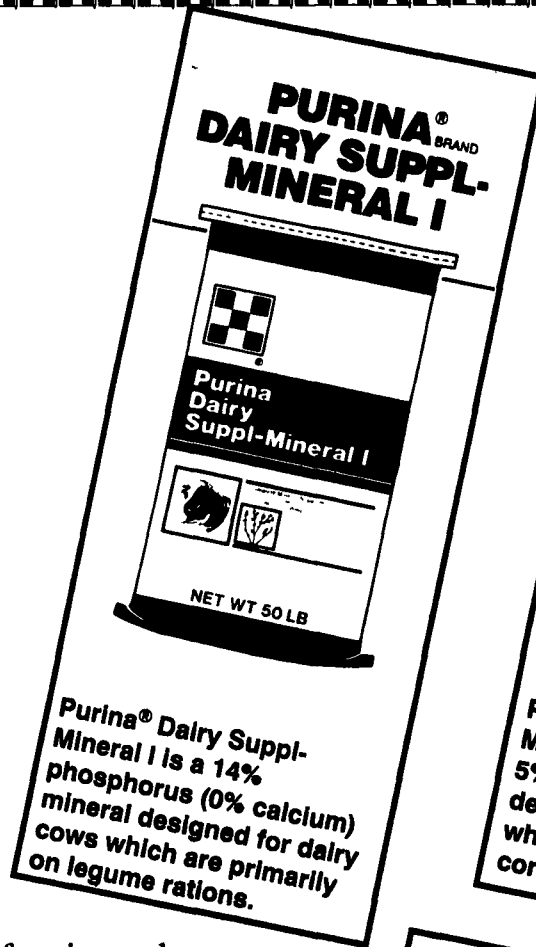

Suppl-Minerals were developed primarily to fit into any program where the dairy animals do not require much of our milking completes or concentrates; for example, in late lactation, during the dry period, or for the heifer.

Purina Minerals use only quality ingredients with high biological availability. They are more easily absorbed into the animal's system.

Purina Minerals are flavored with molasses or other palatability enhancers. That makes animals consume free-choice minerals as often as needed. Purina Minerals are formulated to provide the proper balance of major and minor minerals plus vitamins.

Directions: Blend into total mixed rations or limit-feed to lactating dairy animals to provide 2 to 4 ounces per head per day or as recommended by your Purina Representative.

Feed 4 to 5 ounces/head/day to dry cows and growing heifers not on a Purina Cornerstone[®] or Prepare[®] feeding program.
