Machine investments have to provide a good rate of return for farmers and contractors. Over the years, the CLAAS JAGUAR self propelled forage harvesters have established a unique reputation for outstanding output, reliability and versatility along with unbeatable forage quality. These factors, combined with ease of service have made them the favourite investment in this machine category. With the JAGUAR 880 and 860, plus the new 840 and 820 models, CLAAS provides you with a complete new generation of machines. They incorporate the latest in technology for unrivalled forage harvest performance. Extremely high powered Mercedes engines provide power for toughest operating conditions. A new cab design makes for an ideal working environment. Changeover times are quicker than ever to maximize your productive time. Automatic greasing cuts downtime considerably. All in all it adds up to the highest performance available, with a throughput of the JAGUAR 880 or around 170 t/h in corn, more comfort and of course a better return on your invested capital.

A Proud Heritage of Performance And Value Continues. MF 200 Series

The newest MF 200 Series tractors carry forward the traditions set forth by Harry Ferguson when he invented the first modern tractor over 75 years ago. Ferguson, a successful tractor dealer and talented mechanic in Ireland, observed that simply relying on the weight of the tractor for traction was inefficient. In addition, simply hitching a plow to the drawbar frequently caused tractors to rear over backward when the plow struck an obstruction. Late in 1917, Ferguson applied for the first of a long series of patents that defined what came to be known as the "Ferguson System"

For serious loader jobs, you can't beat an MF 253 with the speed of an optional synchro shuttle transmission and the traction of 4-wheel drive. New for '93!

MASSEY FERGUSON
