

Maryland DHIA Report For January

The January 1994 Dairy Herd Improvement information for dairy herds from the DHI processing center in Provo, Utah. The list includes herds from Maryland, Pennsylvania, and West Virginia. The information is listed by herd name, county association, number of cows in the herd and the average production per cow in the herd. To be included, the herd must have 10 cows averaging 65

pounds or more of 3.5 percent fat corrected milk per cow, per day. All herds reported are on official DHI or DHIR test.

Also listed are the top 10 herds in Maryland for the Brown Swiss, Guernseys, and Jerseys, and the top eight herds for Ayrshires.

High Ayrshire Herds				
Herd Name	County Ass'n	Cows	In Milk	Avg. FCM T
David & James Patrick	Howard	63		61.8
Ralph W. Shank	Wash.	147		56.6
