**Mesh Wrap
Attachment**

Studies have shown that losses from handling and spoilage for a round bale stored outside can be as high as 30% more for a twine-wrapped bale as opposed to a bale wrapped with mesh. Mesh wrap serves as a barrier to moisture absorption. As a result, quality losses resulting from decomposition are reduced.

Mesh wrap also reduces losses during bale handling and transporting and because fewer turns are produced when wrapping versus tying with dual twine arms (2 to 2.5 wraps vs. 10 to 15 turns), there is significant savings in the time required to finish a bale. The optional mesh wrap is available as a field-attachment for the following round balers.

- 8455 Tractor Hydraulic • 8465 AUTOMATIC
