

CORN TALK NEWS

PENNSYLVANIA MASTER CORN GROWERS ASSOC., INC.

It's Time To Join Corn Growers

STATE COLLEGE (Centre Co.)—The Pennsylvania Master Corn Growers Association (PMCGA) is pleased to announce continuing support for the Membership Incentive Program (MIP) that is being conducted in conjunction with several cooperating seed companies.

The MIP, with seed corn company sponsorship, will entitle any corn grower who plants at least five acres of corn to a free bag of seed corn (standard size) with a three-year membership in PMCGA/NCGA.

This program applies to all

three-year memberships, new or renewal.

To participate, simply complete the membership form included in this issue of *Corn Talk* and indicate the brand of seed corn you would like to try.

Remember, the theme of the program is "Try Something New." Growers who sign up will receive a free bag of seed from the company chosen by PMCGA. The grower will make the ultimate decision about which hybrid he will receive in consultation with the local seed corn dealer for the company selected. PMCGA will send the names and

addresses by brand chosen to the appropriate seed corn company's statewide contact person, and that person will contact the grower.

Locally, those who sign up will be helping to support PMCGA's activities, such as *Corn Talk*, the annual Pennsylvania Crops Conference, and local corn promotion activities.

The PMCGA board of directors have also developed a membership program in cooperation with DuPont. This program is targeted at recruiting new members of PMCGA. Any Pennsylvania corn grower who joins PMCGA for three years for the first time is eligible to receive a free four-acre sample of Accent herbicide (\$100 retail value).

The offer is available to anyone who grows more than 100 acres of corn, has not been a member of PMCGA before, and who has not received an Accent sample in the past. There is a limit of one sample per farming operation. In addition, new three-year members can elect to participate in the PMCGA Membership Incentive Program and elect to try a free unit of seed corn from one of the participating companies on the membership application.

MILLER PRO Crop Sprayers

- Complete Line Includes 3-Point, Truck, Saddle Mount, and 300, 500, 750 or 1000 Gallon Trailer Models

___Seedway ___Chemgro ___Funk's G
___Agway ___Pioneer ___NC+

The Accent New Member Program

☐ Check here if your eligible for the Accent new member program. (New member, 100+ corn acres)

When You Plant CFS Waxy Hybrids, You're Planting More Than Just Corn.

Facts prove that starch content is what makes corn the ideal animal feed. And that's what makes CFS waxy corn different from dent. CFS waxy is 100% amylopectin starch ... zero percent amylose. (Dent is 25% amylose).

Amylopectin starch is more digestible. That means CFS waxy maintains no less than a 25% advantage over dent ... in the feedlot or milking parlor.

On-farm tests show the average weight gain/feed efficiency in beef, sheep, swine and other animals fed waxy corn increased up to 10% over dent fed animals.

In dairy herds CFS waxy increased butterfat, protein and milk production.

And, CFS waxy yields as well, if not better than dent. And it costs no more. Also, CFS waxy can be produced as a cash crop ... often bringing premium prices when used for export.

Faster weight gain, more milk and flexibility ... that's why CFS waxy hybrids are more than just corn.

See Your Local CFS Seedsman for More Information.
