WARNING!

An odorless, colorless, invisible--and costly--forage thief!

You can't see it--and you can't stop it. Storage losses in forage can steal your valuable crop--how much is lost depends upon how you store your feed:

- Tower Silos have Up to 8% loss*
- Bunkers have Up to 45% loss**

If the average difference in feed lost between tower silos and bunkers is 30%, then storage of 1000 tons will mean 300 tons MORE lost in a bunker. If silage is valued at \$30 per ton, the additional losses from bunker storage would be \$9000 a year.

For information on losses for all types of crop storage methods, contact the Crop Storage Institute for your free copy of "Methods of Crop Storage" and "Know the Facts."

THE SYMO-LIFE SOIL FERTILITY PROGRAM Has More To Offer

Efficiency Is The Key To Profit!

We test your soil and make recommendations as to needed nutrients, based on:

- The capacity of your soil to produce
- The genetic production potential of your crop.
- The type of livestock you are feeding.

Produce More Nutrients Per Acre!

- Produces a more nutritious feed stuff with a better nutrient balance for your livestock.
- Realize a greater net return on your investment
- Program can be integrated with your present dry or liquid fertilizer
- Improved quantity yield/acre along with improved nutrient yield/acre.

- CSA Liquid Micro Nutrients • Organic Blends
