## 8315 Disc Mower Conditioner

**15 Foot Swing Frame, Pull Type**

### First Of Its Kind

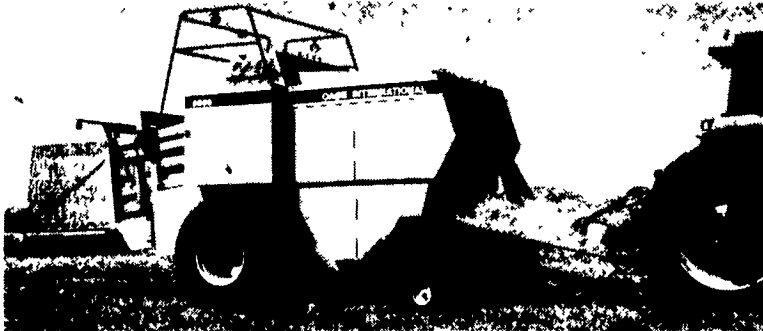

The 8315 is the first mower conditioner of its kind to combine a center-pivot tongue and mechanical drive with 15'3" (4.65m) rotary disc cutting performance. With its wide cutting width, the 8315 is designed to handle large acreage hay production.

A hydraulic center-pivot tongue and swivel gearbox hitch enables the 8315 to cut fields in both directions or turn corners with ease. Its rotary disc header features a heavy-duty spur gear cutterbar and 10 oval cutting discs that are powered by a belt and gearbox drive. High-speed discs are heat treated spring steel for durability and spin at 2,600 rpm to slice through the toughest crop conditions. Header tilt is also hydraulically controlled from the cab.

The wide 110" (2.79m) steel-on-steel intermeshing conditioning rolls feature automatic separation for non-plug operation, and adjustable roll spacing and pressure. A swath baffle and adjustable windrow forming shields are standard.

## JUMBO BALES

A Case International 8580 large rectangular baler makes JUMBO bales - up to 2,000 pounds. It compresses hay equivalent to about 40 conventional bales into a single high-density package. The high-end capacity and performance of the 8580 means you can push these big bales through the machine all day - every day. That's a lot of hay!

And it's quality hay, too. The center-line design handles the crop gently to preserve

nutritious leaves. The bales are uniformly shaped for efficient handling and shipping.

The 8580 also has a full list of standard features: Low-profile pickup, pre-packer chamber, massive gearbox, heavy-duty components throughout, electronic monitoring, double-tie knotters and low maintenance. And it's simple to operate.

The Case International 8580 is a JUMBO value, too.

**Coming Soon, Place Your Order Today Also 8570 In Stock, See Binkley & Hurst Today!**

### Mesh Wrap Attachment

Studies have shown that losses from handling and spoilage for a round bale stored outside can be as high as 30% more for a twine-wrapped bale as opposed to a bale wrapped with mesh. Mesh wrap serves as a barrier to moisture absorption. As a result, quality losses resulting from decomposition are reduced.

Mesh wrap also reduces losses during bale handling and transporting and because fewer turns are produced when wrapping versus tying with dual twine arms (2 to 2.5 wraps vs 10 to 15 turns), there is significant savings in the time required to finish a bale.

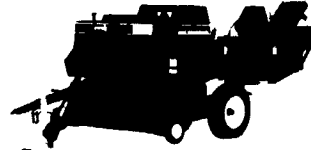

The optional mesh wrap is available as a field-attachment for the following round balers:  
• 8455 Tractor Hydraulic • 8465 AUTOMATIC  
• 8465 Tractor Hydraulic • 8460 after Pin CFH0057418

Binkley & Hurst Bros.

## FULL-FEATURED PERFORMER

The Case International 8340 mower conditioner offers you features in a 9 foot plus cutting width that you'd only expect to find as options, or on a larger more expensive machine.

Features like a heavy box-beam frame and tongue that you hydraulically position from the tractor. Quickly steer around field obstacles or switch between field and transport positions. Low maintenance describes the 1700 stroke per minute sickle. Sickle sections bolt-on for quick and convenient replacement.

A five-bat reel feeds the crop uniformly into the conditioning rolls. Rolls automatically separate to reduce the chance of plugging. And there are even more features that make the Case International 8340 a truly deluxe high performance mower conditioner. Stop in and see them all!

Also 12' swing frame & self propelled machines in stock. Don't wait, save by seeing Binkley & Hurst
