Gehl TMR Mixer Feeders Are #1

nothing can maximize the return on investment in your dairy or beef feeding operation like a Total Mixed Ration (TMR) feeding system. And nothing makes TMR work better than a Gehl mixer feeder. Here's why:

- **Better Mixing Action** — Unique four-auger design creates a double figure-8 mixing pattern for fast and complete mixing of all feed ingredients.
- **Energy Efficient** — Planetary drive system requires less horsepower.
- **Built To Last** — Patented star couplers absorb shock loads by allowing the bottom augers to flex, providing long service life.
- **Six Sizes** — From 150 to 500 cubic feet mixing capacities.
- **Three Styles** — Trailer type, stationary and truck-mounted units to fit your operation.

GEHL.

Most Mix-All owners will never buy another.

**Model MX125
And Model MX170
In Stock**

In fact, you'd probably have a hard time convincing Gehl Mix-All owners to even look at anything else. And why should they?

The Mix-All's big 21-inch wide hammermill features 66 reversible thin hammers that cut, rather than pound the feed to deliver a more consistent grind and ensure uniform mixing for a better feed conversion rate.

Gehl's self-contained hydraulic system is designed-in, not added on. It provides the precision of infinitely variable in-feed attachment control to match tractor power for greater grinding capacity. Plus you get fast, smooth, trouble-free unloading with greater reliability.

And a wide variety of options and attachments lets you customize your Mix-All to fit any operation.

Ideal For Low Clearance Poultry Houses! Look At This Powerful Low Clearance Diesel Skid Loader

A Gehl Disc Mower Will Cut Your Most Difficult Crops Quickly Without Plugging!

Reliable, proven heavy-duty disc cutterbar features gear-driven discs, rotating at 3,000 rpm. Gears and bearings are sealed in an oil bath for less wear and long life. The low profile cutterbar design assures a uniform cut, even in dense crops. Positive four-V-belt drive transmits power to the bevel gearbox. Self-adjusting compensation spring delivers accurate cutterbar down pressure. Cutting height is easily adjusted by the tractor top link. Hydraulic cutterbar lift is standard. 6 disc cutting 7'10"

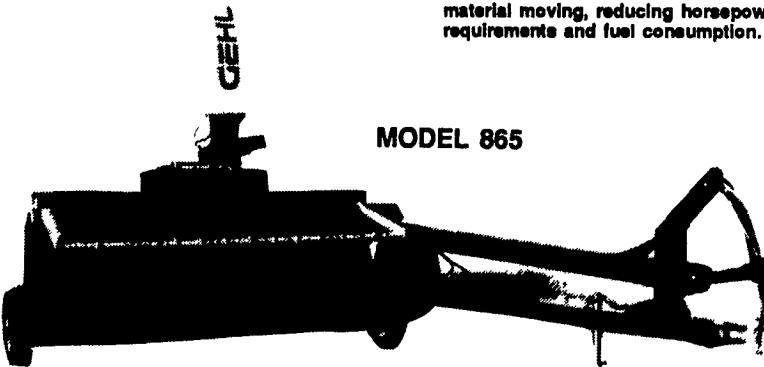

Gehl-The First Name In Forage Harvesting

Model 865 delivers high-capacity at an economy price for extra value. The 865 is designed for use with tractors from 80 to 150 horsepower (1,000 rpm) or up to 120 horsepower with 540 rpm.

Standard equipment includes an in-head hydraulic knife and cutterbar sharpening system, electric controls, one-way shear-bolt protection system, single station cutterbar adjustment and an over-running clutch. Gehl's Metal-Stop™ metal detector is an available option.

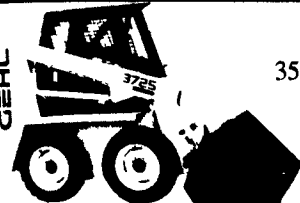

The eight-knife cutterhead is close coupled to the blower for continuous inline crop flow from the cutterhead to the blower to the spout. The cylinder is actually set into the blower compartment, speeding material flow from the cutterhead into the blower cylinder momentum and blower suction keep material moving, reducing horsepower requirements and fuel consumption.

High Capacity With Unmatched Economy

The highly efficient Model 865 uses less horsepower per chopped ton than larger model forage harvesters.

COST CUTTERS

9' and 10 1/2' Model In Stock

— High speed discs — Each disc has two knives to slice through the toughest crops and conditions the disc gear drive operates in an oil bath for long life.

— Sturdy frame — Cradles the cutterbar for extra protection and durability

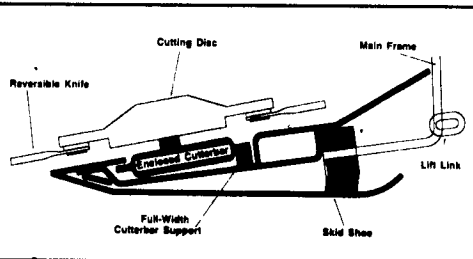

— 540 and 1000 rpm driveline with equal-angle hitch for smooth power transfer.

Gehl has two all new disc mower conditioners to cut your crop down to size, fast and easy. The DC2340 has 7 discs and a 9 foot cutting width, the DC2360 has 8 discs, and a 10 1/2 foot cutting width.

— Standard hydraulic tongue Makes it easy to position the unit without leaving the tractor seat

GEHL.

A sturdy cutterbar support frame extends beneath the entire cutterbar. This design shields the cutterbar from direct impact with rocks or other field obstructions.
