**Save On Tough, Hard-Pulling Tractor Rears**

- Revolutionary 3 lug/pitch design improves traction and ride
- Computer designed "natural" shape casing improves body life
- Radial construction provides better traction, lower fuel and overall cost

**High Traction efficiency, Long Tire Wear**

- Excellent drawbar pull with long-bar, short-bar lugs for improved traction
- Designed for improved stability and roadability, plus reduced vibration
- Strong angle-braced lugs have self-cleaning design

**GOODYEAR**  
#1 in Tires

**MONTHLY MAINTENANCE TIP**

*Sidehill Work*

When working back and forth on the side of a hill, the rear tractor tires will alternately be on the down side. It is recommended that the inflation pressure in both rear tires be increased by 4 PSI under such conditions. When one tire is continuously operated in the down slope position, it is only necessary to increase the inflation pressure in that tire.
