DER Invites Public To Sewage Sludge Roundtable Discussion

HARRISBURG (Dauphin Co.) — The public is invited to attend a roundtable discussion of the land application of sewage sludge and septage, 6:30 p.m., May 2, at the Harrisburg headquarters of the state Department of Environmental Resources (DER).
 According to a news release from DER, the focus of the roundtable discussion is come up with suggestions for improving the process of the land application of sewage sludge and septage.
 The meeting's two-hour format is to consist of one hour of presentations from five speakers, followed by an hour of open discussion.
 The five speakers are to represent five different perspectives on the application of sewage sludge. A representative of a local citi-

zen's group, a farmer, septage hauler, treatment plant operator, and a representative from DER are to field those perspectives.
 The intention of the forum is to "identify the essential and sound ingredients of the land application program, the places where improvements should be considered, and ideas for making those improvements," according to the news release.
 The roundtable group meets four times per year at the DER headquarters building, located at 400 Market Street, in Harrisburg.
 Action by DER, on results and possible recommendations coming from the meeting, is to happen during the July meeting of the roundtable group.
 For more information, call DER at (717) 787-4686.

FARMER BOY AG, INC.

HEATING

CLEARANCE

On All New & Used Heaters In Stock

The PuraFire heater provides a consistent, cleanburning and fuel efficient source of warmth for all types of poultry and swine houses. With near 100% efficiency, it uses less energy to yield greater BTUs for your money. Choose from two models: the C80M variable output (40,000-80,000 BTUH) and the C225 (225,000 BTUH). Each is LP or natural gas compatible and can be mounted inside or outside your confinement house.

FLOORING

Woven wire is generally used for hog flooring but is not limited to this use. Elevator fencing, fork truck safety cages, wire truck tailgates, etc. can also be made from the same construction. Call for your specific job needs.

Plastic Flooring

Sanitation - Constructed of solid plastic material. Some plastic floors are foamed. As these floors wear down their micro air pockets fill with bacteria which make the floor difficult, if not impossible to disinfect. This flooring features a triangle underside design which diminishes the need for high pressure washing from below to completely clean, as the floor can be cleaned sufficiently from above.

Outstanding Traction - Unique "High-low" finger design provides traction for pigs of all sizes, while enhancing safety and comfort.

ULTRASOUND FOR ULTRA-PROFITS™

PREG-TONE®

A Fast, Safe and Accurate Ultrasonic Pregnancy Tester for Hogs and Sheep

No lights to watch! No buttons to push!
