**A Gehl Disc Mower Will Cut Your Most Difficult Crops Quickly Without Plugging!**

Reliable, proven heavy-duty disc cutterbar features gear-driven discs, rotating at 3,000 rpm. Gears and bearings are sealed in an oil bath for less wear and long life. The low profile cutterbar design assures a uniform cut, even in dense crops. Positive four-V-belt drive transmits power to the bevel gearbox. Self-adjusting compensation spring delivers accurate cutterbar down pressure. Cutting height is easily adjusted by the tractor top link. Hydraulic cutterbar lift is standard. 6 disc cutting 7'10"

**Gehl-The First Name In Forage Harvesting**

Model 865 delivers high-capacity at an economy price for extra value. The 865 is designed for use with tractors from 60 to 150 horsepower (1,000 rpm) or up to 120 horsepower with 540 rpm.

Standard equipment includes an in-head hydraulic knife and cutterbar sharpening system, electric controls, one-way shear-bolt protection system, single station cutterbar adjustment and an over-running clutch. Gehl's Metal-Stop™ metal detector is an available option.

**MODEL 865**

The eight-knife cutterhead is close coupled to the blower for continuous inline crop flow from the cutterhead to the blower to the spout. The cylinder is actually set into the blower compartment, speeding material flow from the cutterhead into the blower cylinder momentum and blower suction keep material moving, reducing horsepower requirements and fuel consumption.

**High Capacity With Unmatched Economy**

The highly efficient Model 865 uses less horsepower per chopped ton than larger model forage harvesters.
