

Best Values in New Equipment

We hear you.

Like most aspects of farming, baling has changed dramatically over the last 20 years. Once it involved rounding up a bunch of kids to load wagons; slowly, it has evolved into the era of one man and big round bales. And now, in response to your requests, this evolution continues.

With continued improvements, the Case International 8570 mid-sized rectangular baler and its big brother, the 8580 large rectangular baler, make baling more convenient than ever. Both are proof that we do indeed hear you.

These machines produce a bale size and weight up to 1,000 lbs. for the 8570 and 2,200 lbs. for the 8580 that's easy to stack, store, transport and feed.

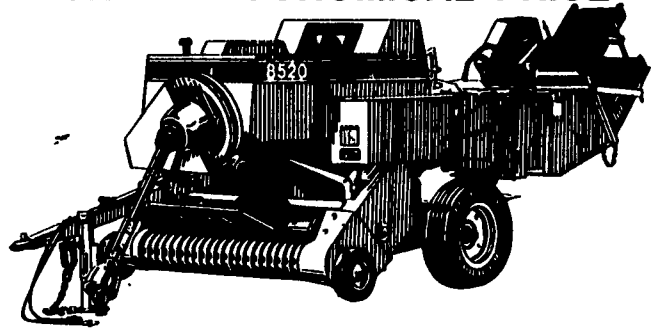

Formed with easy-separating flakes, these bales can be fed by hand, processed, or pulled apart by livestock. They're tight and dense for handling and shipping ease. And thanks to the design of the 8500 Series balers, they're packed with nutrition.

A wide, low-profile pickup reduces the loss of valuable leaves, while the pre-packer chamber keeps nutrients contained within the bale. And each pre-formed flake is exceptionally uniform in size and weight.

The Case International 8570 and 8580 rectangular balers. You asked for an evolution in baling, and we heard you. Find out more from your Case IH dealer today.

And ask about Total Product Support. It's the commitment that ensures the performance and overall value of every Case International product.

OUTSTANDING BALER PERFORMANCE MEANS GREATER NUTRITION AT AN ECONOMICAL PRICE

Case International 8520/8530 Rectangular Balers

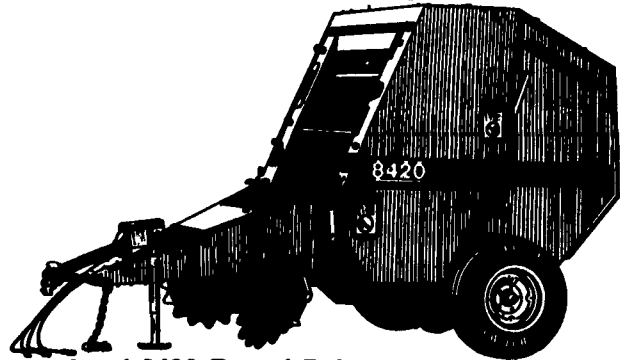

These two balers both feature the Case IH center line design. Eliminates turning corners with the crop to get it into the bale chamber, as is common with conventional designs. This saves valuable protein-rich leaves. Also saves time because you don't have to change from field to road position for transport.

Other outstanding features are:

- Low-profile baler design provides excellent visibility to the rear of the baler.
- Low-profile pickup... reduces crop lifting height, saving nutritious leaves.
- Hay goes straight into the unique prepacker chamber... regardless of windrow size.. for uniform flake and bale density.

Come in soon for the rest of the story!

THE COMPACT BALER WITH BIG-BALER FEATURES

Case International 8420 Round Baler

Produce consistent 39x54-inch bales using only a 30-PTO horsepower tractor. Yet reap the advantage of direct feed, open-throat chamber design so bales build fast, sure and tight. Other big-baler features:

- Aggressive starter roll so each bale starts right.
- Audible signal when bales are done and ready for wrapping
- Cam-actuated low-profile pickup, close tine spacing for clean sweeping of heavy windrows.
- Optional hydraulic twine wrapping system

A heavyweight producer in a lightweight package.
