HAY DAY on
June 8th

With the ROLLANT 46 ROTO CUT, the incoming crop is sliced by the 14 serrated knives, spaced 2.75" apart across the width of the intake. The resulting sliced material can be compressed to a higher density and is much easier to feed out to livestock. CLAAS ROLLANT round balers are a cost effective investment thanks to their output, reliability and ease of maintenance. Their versatility also helps to keep them in action for many months of the year.

VICON GMR 2400/2800/3200 MOWER-CONDITIONERS

Forage harvesting with a GMR Mower-Conditioner means:

- * rapid crop drying as a result of roller conditioning and adjustable swath shape
 - * preservation of nutritional value
 - * high harvesting capacity
 - * greater efficiency of next stage machines (tedder, swath rake, self-loading wagon, baler, etc).
- The GMR Mower-Conditioner has a long service life, is simple to operate and easy to maintain.

MF Dynashift™ transmissions get top reviews.

On the one hand, it's a smooth, productive powershift.

Your left hand controls a 4-speed powershift transmission for smooth, clutchless shifts under load and outstanding productivity.

On the other hand, it's an efficient, reliable manual transmission.

Your right hand controls an 8-speed synchronized transmission with synchronized forward/reverse shuttle.

Together you get a tractor with 32 forward and 32 reverse speeds that's more productive than a manual shift and more economical and reliable than a powershift. Test drive a Dynashift transmission today on one of these outstanding MF tractors:
