The Power Behind Environmental Control

## BreezeMaster

101 Cow Tie Stall Barn—Fleetwood, PA  
Lapp's Barn Equipment can install a high-performance/high efficiency tunnel ventilation system in your barn. A tunnel ventilation system will give you an even air flow throughout your barn of 2-5 mph. This gives you the advantage of better controlling temperature to give your cows more comfort which means more milk! Also, a tunnel ventilation system eliminates circulating fans, provides summer and winter ventilation and controls fly problems! An optional unit can even automate your ventilation so you will never even have to worry about it when you're not there, so you can concentrate on other things! At Lapp's, we sell high quality ventilation systems manufactured by Acme Engineering. Acme products feature such things as:

- Galvanized Construction
- Wide Cambered Propeller
- Riveted Blades
- Unique Captured Bearings
- Vertical Support Frame
- Screens Pre-cut
- Totally Enclosed Motors
- Optional Discharge Diffuser Cone
- Optional Belt Tightener

## Break tradition not your grain.

Advanced design for a higher quality grain sample.

What makes the Gleaner® different makes it better—for your crop and you.

Rotary threshing plus Natural Flow processing let you harvest a cleaner, higher quality crop with less cracking.

A powerful, fuel efficient air-cooled diesel engine delivers easier maintenance and more reliable performance.

Our state-of-the-art ComforTECH™ cab is designed for maximum efficiency and minimum fatigue during long harvest hours.

Plus, there are fewer moving belts and chains throughout for greater reliability, and reduced maintenance. And, the Gleaner is backed by a strong AGCO warranty and service support.

Check out the combine that's as advanced as your operation, now, at your Deutz-Allis dealer. And ask him about flexible AGCO financing.
