

Grazing Meetings Set

BLOOMSBURG (Columbia Co.)—Penn State's multicounty extension unit in the Central Susquehanna Valley has scheduled two grazing meetings during early June.

The first meeting will be at the dairy farm of Harry Nolt in Union County on Friday, June 2 from 10 a.m. until noon. The Nolt's have been converting to a pasture-based system over the past few years. Part of the discussion at this pas-

ture walk will focus on supplemental nutrition programs for cattle on pasture.

From Route 15 between Lewisburg and West Milton, take the Col. Kelly Road at Byerly's Meat Market. Go past the prison entrance about a mile and the farm is right along the road on the right side. From Route 192 between Lewisburg and Forest Hill take the Col. Kelly Road for several miles. After the Buffalo Mennonite

Church the farm is on the left. Look for a red barn and a large area of pasture beside the barn.

A grazing meeting for livestock producers will be held on Tuesday, June 6 from 7-9 p.m. at Black Run Farm, owned by Pete Gatski and Jean Downing. This is a commercial cow/calf farm with about 25 brood cows. They are developing a market for direct sales of beef. Pasture on the farm is managed on a rotational basis.

From Route 42 between Bloomsburg and Millville, turn on Black Run Road at Stackhouse Well-Drilling and go less than a mile and the farm is on the right side. From Route 44 between

Jerseytown and Euckhorn, turn on Black Run Road at the Dutch Hill Church and go about 2.5 miles.

For more information on these meetings, contact Dave Hartman at the Columbia County Extension Office, (717) 784-6660.

POURED SOLID CONCRETE

STORAGE SYSTEM SPECIALISTS

START WITH THE BEST!

POURED CONCRETE WALLS

You get about 40% more concrete for your dollar with a poured, solid concrete basement as compared to a hollow core block basement.

A poured solid concrete basement weighs about 50 lbs more per cubic foot! Far denser. What's more, poured solid concrete walls are monolithic there are no joints!

This is why laboratory tests show poured, solid concrete basements have many times the flexural and compressive strength to withstand the side and down pressures caused by earth, wind, water and building loads and the material density to resist water penetration.

Best of all, thanks to modern and efficient construction techniques, poured, solid concrete basements are competitively priced.

Solid Concrete For:

- Manure Pit Walls
- Hog House Walls
- Barnyard Walls
- Chicken House Walls
- Retaining Walls
- House Foundation Walls
- Silage Pit Walls
- Cistern Walls
- Concrete Decks
- Concrete Pit Tops
