

**WE PROUDLY
SALUTE OUR**

DAIRY INDUSTRY

TANCO AUTOWRAP

**THE WRAPPER
THAT WRAPS
BALES
OTHERS WON'T**

A complete range of Round,
Square & Rectangular Wrappers.

Patented advantages like the unique "Deep Cradle" continuous full width belt, and fully supported turntable where four polyurethane wheels provide Tanco's renowned even and balanced operation, even with overweight and misshapen bales. Quality wrapping and quality machines that has made Tanco among the World's leading manufacturers.

Why spend your dollars on a "job shop" type machine that requires a large tractor, needs near perfect bales to work properly, and is scary to see in operation. Don't forget: "Penny wise, pound foolish". It takes a quality product to do quality work.

TUBE-LINE BALEWRAPPER

Gray's Patented Tube-Line Bale Wrappers offer the best of both worlds between individual wrappers and in-line bag machines.

By wrapping only the barrel of each bale, up to 40% less film is used, but since each bale is wrapped tightly, no air pockets can form between bales of unequal size.

Models available to accommodate all sizes of both round and large square bales.

New for '95 - Fully automated machine with twin 30" pre-stretchers.

DEUTZ FAHR Round Balers

**Quality
Equipment
To Preserve
Quality
Crops.**

Deutz-Fahr round balers have established a world-wide reputation for innovation, durability and performance.

**Here Are Just
A Few Reasons
Why...**

**Standard Equipment
on all Balers includes:**

- Hydraulically controlled pickup with dual pneumatic gauge wheels, baffle plate and galvanized scrapers.
- Efficient pickup line spacing and open throat design to gently handle even large windrows without plugging.
- Internally re-enforced ribbed profile rollers, (17 on GP230, 22 on GP250) are designed to eliminate wedging and wrapping in wet crops, and reduce leaf loss in dry material. Ribbed profile rollers are less aggressive than large "dimpled" sheets.
- Driven roller shafts are splined, not keyed, for long life. No external chains and rollers bearings to replace either!
- Extra sturdy fixed chamber design:
GP230 makes 4x4 bales
GP250 makes 4x5 bales

- Central control, tractor mounted "Pilot Box" for electronic and hydraulic functions with both audible and visual indications.
- Single acting hydraulic remote is all that's needed for all hydraulic functions.
- Automatic chain lubrication system.
- Fully automatic "twin-fix" twine tying system, the fastest in the industry. (14 seconds!) (Optional net wrap attachment can be added any time)
- Bale ejector with extendable ramps.
- Safety light package.
- Wide angle PTO shaft
- Wide, heavy ply tires.

**"Opticut" models available to
increase high moisture bale density
and bale feedability.**

**All these features translate
into outstanding performance
and long life.**
