**National
Egg Market**

ATLANTA, GA
MAY 31, 1995

Prices were unchanged. The market tone remained mostly steady. Demand covered the full range, and was mostly moderate. Food service and retail features provided the best movement. Supplies were adequate or available, and light weight eggs became fully adequate in many areas. Surplus light eggs sold into export channels. Breaking stock supplies were adequate for the fair demand. Live hen offerings remained readily available for the unaggressive demand.

For additional information, please call (404) 347-4121.

**TIPS TO
IMPROVE
EGGSHELL
QUALITY...**

Dr. Milton Scott
Nutritional Consultant

"Let's get specific"

Check specific gravity of eggs on a regular basis to monitor shell quality. The percent "floaters" and "eggs in transition" in a room temperature solution of 1.08 sp. gr. is a good bench mark.

A 10 gal. bucket, a hydrometer, and an individual egg scale is all the equipment you need. Used with breeder guidelines, this test can help you fine-tune the level of oyster shell needed at each stage in the laying cycle.

For details on sp. gr. tests and the use of oyster shells, contact The Fox Co., PO Box 708, Newfield, NJ 08344. FAX 609/697-1692, Phone 800/257-7022.
