**National
Egg Market**

ATLANTA, GA
JUNE 6, 1995

Prices ranged from unchanged to lower on mediums, and unchanged on heavier weights. The market tone was about steady to steady on larger sizes and still barely steady to weak mediums. Demand was irregular but usually light to occasionally fairly good but where scattered features were in progress. Supplies were at least adequate with additional product available on mediums. Breaking stock supplies were at least adequate for the fair demand. The undertone ranged from steady to barely steady. Live hen supplies were readily available for the light demand.

For additional information, please call (404) 347-4121.

IMPROVE
EGGSHELL
QUALITY...**

Dr. Milton Scott
Nutritional Consultant

"Check calcium separation"

Samples taken at different locations in the same feed line at the hopper outlet, the far end of the house and at the return, often show a wide variation in calcium levels. Both excessive levels (which cause hens to back off feed) and low levels---prevent adequate calcium intake and cause poor shell quality. Oyster shell's specific gravity (0.86) is close to that of a typical layer ration. This helps prevent Ca separation and build up.

For details on sampling for Ca separation, and the use of oyster shells, contact The Fox Co., PO Box 708, Newfield, NJ 08344. FAX 609/697-1692, Phone 800/257-7022.
