REPLACING HOG FLOORING? CONSIDERING NEW CONSTRUCTION? CHECK OUT Polygrate™ Heavy Duty Hog Flooring

Time Tested and Proven
This style of POLYGRATE was first introduced in 1981. Over the years Farcox has continued to refine this product. POLYGRATE is one of only a few "World Class" floors that has stood this test of time.

Outstanding Traction
POLYGRATE'S unique "high-low" finger design provides outstanding traction for pigs of all sizes, while enhancing safety and comfort.

◆ POLYGRATE'S rounded corners minimize injuries. The edges are beveled providing a smoother, safer surface that promotes comfort, too.

What Does This All Add Up To?

- ◆ More piglets survive until weaning
- ◆ Less splay/spraddle leg problems
- ◆ Heavier piglets at weaning
- ◆ Better conditioned sows at weaning

Open gilts from top bloodlines, scanned for backfat and loineye, \$25 over market. Club pigs available, \$1/per pound. Also, feeder pigs. Certified free herd.

Filth-Breeding flies cause disease ...
... and the chemicals used to control them can make your animals sick.

THE SOLUTION:
Filth-Breeding Fly Parasites!

We're offering three mixed species of tiny, nocturnal, non-swarming parasitic wasps *Muscidifurax zaraptor*, *M. raptorellus* and *Spalangia endius*. These tiny parasites work by laying their eggs in the pest flies' pupae. The eggs then hatch, and as they develop, they consume their host: the immature filth-breeding fly. Instead of a new pest fly hatching out, a new parasite will hatch out instead. The cycle will repeat.

Positive fly control can be obtained without the use of chemicals. And the use of these parasites, with adult fly trapping, has proven itself a safe and effective means of coping with a potentially severe problem.

Use this approach in any operation beef, equine, dairy, poultry, swine, canine and many more.

For information pertaining to setting up a season-long program, pricing, or any questions, please call ... C & M FARM SERVICES.
