## The New CLAAS 800 SERIES FORAGE HARVESTERS

The cooling system is unique and features an enormous cooling area. The air is sucked in via a rotating screen from the front, working with, not against the travel speed. The cooling area is enormous.

Air is then discharged via the rear. Apart from its outstanding effectiveness, this system keeps the temperature in the cab down as well.

Accessability to the cooling system is excellent. The oil cooler, air conditioning and the engine radiator are all easy to get to in seconds. All you need to do is open up the hinged rotating screen, and that's it. A typical example of the attention to detail which makes servicing of this machine so straightforward.
