8315 Disc Mower Conditioner 15 Foot Swing Frame, Pull Type

First Of Its Kind

The 8315 is the first mower conditioner of its kind to combine a center-pivot tongue and mechanical drive with 15'3" (4.65m) rotary disc cutting performance. With its wide cutting width, the 8315 is designed to handle large acreage hay production.

A hydraulic center-pivot tongue and swivel gearbox hitch enables the 8315 to cut fields in both directions or turn corners with ease. Its rotary disc header features a heavy-duty spur gear cutterbar and 10 oval cutting discs that are powered by a belt and gearbox drive. High-speed discs are heat treated spring steel for durability and spin at 2,600 rpm to slice through the toughest crop conditions. Header tilt is also hydraulically controlled from the cab.

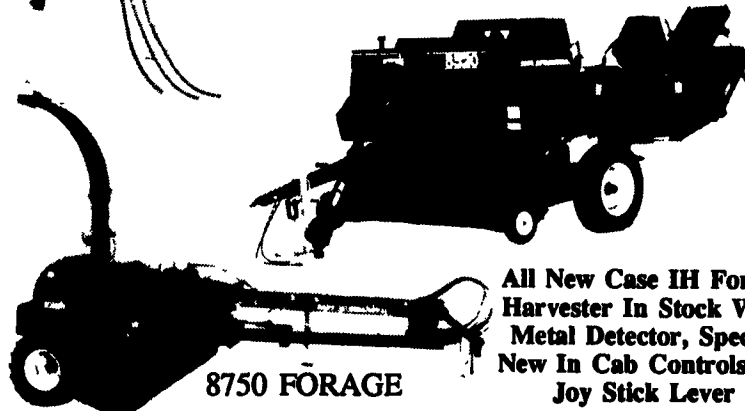

The wide 110" (2.79m) steel-on-steel intermeshing conditioning rolls feature automatic separation for non-plug operation, and adjustable roll spacing and pressure. A swath baffle and adjustable windrow forming shields are standard.
