

Roxanne Kirst, Pennsylvania Cattleman's Queen, left, delivered the first pitch at the start of the Reading Phillies game against the New Haven Ravens on Monday evening. She also got to keep a ball, autographed by all the R-Phils, a minor league team of the Philadelphia Phillies, which they presented to her. Roxanne, together with Tammy Balthaser, representative for the Pennsylvania Beef Council, handed out about 2,000 T-shirts to about 5,000 who attended the game.

## T-Shirts Promote Beef At The Ballpark

(Continued from Page A1)

about 1,000 complimentary tickets to the game.

Roxanne, 18, is the daughter of Roger and Fern Kirst, Fredericksburg. This was her first promotional event at the Reading Municipal Stadium.

Roxanne said she has done two promotions so far. She enjoys "being a role model for kids" and enjoys being able to meet many kinds of people to "talk about

beef."

Roxanne, a sophomore in food science at Penn State, will be traveling to Pittsburgh to attend the National Holstein Association Convention at the end of the week. She will also travel to Denver, Colo. in July as part of the Cattleman's Association meeting. While in Denver, she will be learning about food safety.

The only bad news — Reading lost to the Ravens, 8-1.

## Breeze Master

90 Cow Tie Stall Barn—Atglen, PA

Lapp's Barn Equipment can install a high-performance/high efficiency tunnel ventilation system in your barn. A tunnel ventilation system will give you an even air flow throughout your barn of 2-5 mph. This gives you the advantage of better controlling temperature to give your cows more comfort which means more milk! Also, a tunnel ventilation system eliminates circulating fans, provides summer and winter ventilation and controls fly problems! An optional unit can even automate your ventilation so you will never even have to worry about it when you're not there, so you can concentrate on other things! At Lapp's, we sell high quality ventilation systems manufactured by Acme Engineering. Acme products feature such things as:

- Galvanized Construction
- Wide Cambered Propeller
- Riveted Blades
- Unique Captured Bearings
- Vertical Support Frame
- Screens Pre-cut
- Totally Enclosed Motors
- Optional Discharge Diffuser Cone
- Optional Belt Tightener
