Side with Alumax ALU-TUFF Steel

When you put up a building, you expect it to be attractive and to last. A building constructed with ALU-TUFF will meet those expectations. That's because ALU-TUFF is made using top-quality materials, super-tough protective coatings, and a unique rib design that's both functional and attractive.

Years from now when other buildings are starting to show their age, your building will still look good.

- A STRONG PROFILE**
High 3/4-inch ribs on nine-inch centers give ALU-TUFF exceptionally high spanning properties for its weight and thickness, while stiffening ribs in flat areas prevent rippling.
- MADE TO LAST**
To keep Alu-Tuff working hard and looking good for years to come, we protect it with an oven-cured system of *four different coatings*.
- A GREAT LOOKING PANEL**
You don't have to sacrifice good looks to get a tough steel panel.
- MORE QUALITY FEATURES**
Each ALU-TUFF sheet is 38 inches wide to provide 36-inch coverage. That's wide enough to minimize the number of side laps, yet narrow enough to be easy to handle.
