**AG-AIR MIST SPRAYER**  
*The Closer You Look - The Better We Look*

**FRUITS & VEGETABLES**

Many producers/growers have sprayed their crops with Ag-Air Mist Sprayers. They have reported excellent results and in half the time in such crops as sweet corn, tomatoes, cabbage, onions, cucumbers, strawberries, peppers, melons, grapes, cranberries, raspberries, wild blueberries and edible beans. For vegetable fungicides and insecticides, they are using approximately 1-2 gallons of total spray per acre at swath width ranging from 40' to 60'. With vine crops such as melons, cucumbers, pumpkins and grapes, the Mist Sprayer will deposit spray droplets on the underside of the leaves. This is next to impossible with a conventional boom sprayer or aerial spraying.

With a Mist Sprayer there are no streaks or missed spots as in aerial spraying and 100% better control of the chemical and its target area with proper application and bordering.
