Tobacco Sucker Control

Our price is set by the quality ingredients we use and the special care we take in formulation. Off-Shoot-T is a premium product that delivers premium performance. University tests over a 5-year period prove that Off-Shoot-T helps produce an average increase of 86 pounds per acre, compared with popular "bargain" contacts. That's a bonus of as much as \$135 an acre.

And count on an increased yield that will more than pay back the few extra cents you spend for premium performance

1 Rain won't matter if Off-Shoot-T has been on over an hour. If it has been on less than an hour you may need to reapply the chemical

Dark Tobacco: 6-8 ounces per gallon of water (This is one part Off-Shoot-T to approximately 16-21 parts water)

Maryland Tobacco: 4-4 1/2 ounces per gallon of water (This is one part Off-Shoot-T to approximately 25-30 parts water) One gallon diluted product will treat approximately 190 plants

If we lowered any of our quality standards, we could sell Off-Shoot-T at a bargain price, but you wouldn't be getting premium performance. You wouldn't be getting Off-Shoot-T. So if you are going to shop for a bargain this year, make sure it's a real Bargain-Off-Shoot-T.

In university tests, and in the field, Off-Shoot-T sets the sucker control standards
