

"Binkley & Hurst Bros." The Home Of Quality Skid Loader Sales & Service! Call Us For All Your Needs YOU'LL LIKE HOW IT TURNS. AS WELL AS WHAT IT TURNS INTO.

One thing you'll appreciate about Case skid steers is how well they maneuver. Thanks to their responsive steering and overall compact size, they have the agility and the power to get the job done. Especially in limited space. Even more impressive is how many jobs they can master. Every Case skid steer is designed to power a long list of profit-producing attachments. So whether the task involves lifting, digging, spreading or cutting, Case machines get it done. And our quick-change coupling systems

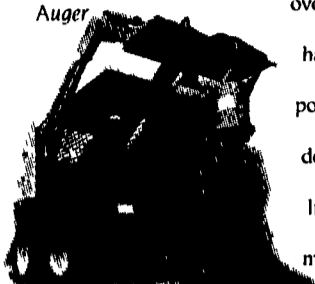

Bale Spike

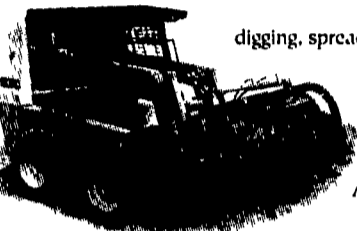

let you switch attachments fast. Plus, all Case skid steers, from our rugged 18 horsepower gas model to our 56 horsepower diesel, provide the ultimate in power, durability and reliability. In fact, we offer more horsepower than the competition in almost every class. And every model is backed by the best parts, service and financing in the industry. Because our feeling is that dealer support should be every bit as strong and versatile as the machines themselves. So visit your Case dealer and find out more about our full line of skid steers. You'll like them for what they are. And especially for what they become.

HOW A PERFECT RATION GETS THAT WAY.

High-capacity grinding, streamlined feed path and thorough mixing make the most of your feed. When you're faced with getting big chores done fast and done right, you'll want a Case IH grinder-mixer on the job, built to be "bottleneck-free," so you can stay on schedule. While some machines with more hammers tend to cause a higher amount of fines, the hardened hammers in the 1350 are spaced properly to provide optimum grinding with low fines. And all hammers can be turned end-for-end and reversed, letting you use all four corners. Built-in productivity like that puts more profit in your pocket. Material flows smoothly through Case IH grinder-mixers because bottlenecks have been eliminated. You'll notice, especially with hay and other bulky materials, that the grinding action is fast and efficient. The grinding screens are positioned so the entire surface area is utilized. The screens are available in 12 different hole sizes; recommended hole sizes for both the 1250 and 1350 are 3/4 in. and 5/16 in. Screen changes take less than a minute, and a handy storage rack keeps extra screens within easy access. Even the best materials can create an inferior ration if not mixed properly. That's why the 1350 is designed to thoroughly blend your feed for optimum palatability and nutrition. As ground material comes out of the top of the mixing auger, a flinger throws the material out against the walls of the tank. Built tough to withstand overfilling conditions, this flinger ensures thorough circulation and mixing of material throughout the tank. Meanwhile, an efficient air system keeps grinding dust to a minimum. While this helps to retain valuable feedstuff, it also creates a better working environment for the operator.
