NAVIGATOR II

STRESS-FREE ROW CROP GUIDANCE

IN STOCK

- Unique design keeps the implement parallel with the rows even when the tractor moves laterally as it drifts off course. Most other systems oversteer the toolbar which adds damaging side pressure to the stabilizing coulters.
- Automatically compensates for sidehill drift.
- Eliminates excessive pull and stress on hydraulic components associated with other guidance systems.
- Very few moving parts provide smooth, friction-free lateral movement.
- Works effectively on all conventional and ridge-till cultivators, planters and 4-wheel drive articulated tractors.
