

**AUTOFLOW™**

**MILKING STALLS**

**With Non-Stop Cow Traffic**

Using less stalls at maximum efficiency lowers the total cost of your automation and improves labor efficiency. Comparison shows it takes as much as 50% fewer AutoFlow stalls to achieve the same throughput as with similarly automated herringbone and parallel systems.

As milking equipment becomes more sophisticated and more expensive, the investment per stall becomes an important factor. The Surge AutoFlow parlor maximizes efficiencies per stall without sacrificing cow throughput.
