#### ALL STEEL, ADJUSTABLE & NON-ADJUSTABLE BALE RACKS

These racks are of all steel construction. The extensive field use and testing has proven this design to be adequate in strength and durability. Available in both regular straight bar or the new curved bar design as shown in the picture. The curved bar tilts the load towards the centre for greater stability.

The non-adjustable racks are of all-welded construction and available in various lengths and widths for different size and number of bales.

Adjustable racks have movable cross members which can be set anywhere along the entire length of rack. Clamping method is simple and rigid and easily adjustable. Crosses are removable for shipping or storage.

The longitude beams on the 30 ft. model are 4 x 10 x 188 H.S. Tube. The longitude beams on the 20' or 25 ft. model are 4 x 8. The cross members are 3 x 5 x 150 H.S. Tube

Adjustable Width  
Cross Members For  
Varying Width Bale  
Size

Ideal for Dry or High Moisture Round Bales
