Take A Look At This Unit, In Stock Now! 30 Foot Long Round Bale Transport Carrier Designed For All Size Round Bales, Check One Out Today At Binkley & Hurst

These racks are of all steel construction. The extensive field use and testing has proven this design to be adequate in strength and durability. Available in both regular straight bar or the new curved bar design as shown in the picture. The curved bar tilts the load towards the centre for greater stability.

The non-adjustable racks are of all-welded construction and available in various lengths and widths for different size and number of bales.

Adjustable racks have movable cross members which can be set anywhere along the entire length of rack. Clamping method is simple and rigid and easily adjustable. Crosses are removable for shipping or storage.

The longitude beams on the 30 ft model are 4 x 10 x 188 H.S. Tube. The longitude beams on the 20 or 25 ft model are 4 x 8. The cross members are 3 x 5 x 150 H.S. Tube.

KELDERMAN AIR RIDE

Adding a Kelderman Air Ride Conversion system to your present suspension will result in a two stage suspension system. This is not to be confused with adding an Air bag mounted above the axle. Allows adding extra spring leafs to increase load rating and still maintain Air-Ride comfort.

The bolt on basic package utilizes an air stem mounted in a convenient location to add or remove air from the system.

Optional 12 volt compressor allows changing air pressure setting on the go. Currently available for front and rear suspension in Dodge Series 250 & 350 trucks. Available soon for Dodge Dakota models.

Also available for some Ford, Chevy and GMC truck models. Special orders available for most motor homes. This option will smooth out the ride on those rough-road fishing/camping trips.

AIR RIDES IN STOCK
