"4672 passed the heat stress test again this year."

Wilbur B. "Brownie" Pierce Perryman, MD

"Our area is notorious for hot dry spells, and 4672 has stood the stress, year after year. It holds up well under the heat, and that's one of the reasons we continue to use it. We especially like the stalk and root strength — no green snap."

"In addition, we can always market it without dockage — the test weight and grain quality always produces an excellent sample."

Producing big yields in a variety of environments is the clear strength of 4672. It has superior stalk quality, and excellent stress tolerance. A 118-day hybrid, it does well in light, medium or heavy soils. It's clear that 4672 and all our other hybrids will protect your seed investment under even the most challenging conditions. Call Hoffman Seeds at 1-800-776-7929 for details.
