It's not too early to begin planning for storing your valuable feeds for 1996! Quality forages and grains become more important as margins decrease in the dairy and livestock industries.

When you think of "quality" feeds, you need to consider "quality" storage. Farmers all over the East (from Maine to Florida, and West to the Mississippi River), are turning to the poured concrete SOLLENBERGER SILO to protect the quality of their feeds.

Listen to what these farmers from VA say about their switch to a poured concrete silo for their hi-moisture shelled corn storage: "Even during the hottest summer in our memory, the shelled corn from our poured concrete silo has kept its bright yellow color and has not heated. We have the best hi-moisture shelled corn ever."

Signed: Keith Wilson, Paul Wilson, Gerald Garber, Cave View Farms, Inc., Weyers Cave, VA.

"THE BLIZZARD OF '93, THE SEVERE WINTER OF '94, THE SNOWY FALL OF '95, the HOT SUMMER OF '95 and THE BLIZZARD OF '96 all INCREASE YOUR APPRECIATION OF THE CONCRETE TOWER SILO"

MEMBER: International Silo Association/PA Forage and Grassland Council/AM Society of Agricultural Engineers/Crop Storage Institute.
