Quality Gehl In Stock At Binkley & Hurst Bros. "Let's Get Together Now!" Binkley & Hurst Bros. Has A Quality Gehl Spreader At Economical Pricing!

GEHL
Box Spreaders

Even when it's empty... it's loaded.

Low profile design means easy loading by skid loader, front end loader or barn cleaner.

Gehl-Tuff Flooring prevents the apron from freezing to the floor, allowing manure to slide out with little resistance. Less apron pull means less wear and tear on drives and apron chains. One piece construction won't flex under heavy loads.

Extra-strong, T-Bar apron chains with an average tensile strength of over 23,500 pounds keep the biggest loads moving.

Double Galvanized steel sides are corrosion resistant for long life. One-piece seamless construction won't catch material or leak.

Optional hydraulic endgate rests in front of the beater paddles to secure sloppy loads and keep heaped material out of the beater unit you're ready to spread. An available litter pan reduces spills in the yard or roadway while enhancing the spread distribution.

Oscillating tandem wheels allow faster ground speeds while providing greater flotation. They're standard on the 325-bushel and 425-bushel models and optional on the 250-bushel model.

Twelve extra wide one-piece beater paddles are symmetrically positioned for broad, uniform spreads. Paddles are fabricated from tough, 1/2" thick high strength steel. Bolt-on replacement tips are available to extend paddle life.

Constant velocity pto for continuous, smooth chatter-free power transfer when spreading on turns and reduced stress on the entire drive line.

UNMATCHED CAPACITY

Model 865

Standard equipment includes an in-head hydraulic knife and cutterbar sharpening system, electric controls, one-way shear-bolt protection system, single station cutterbar adjustment and an over-running clutch

Model 865

Most Mix-All owners will never buy another.

Model MX125 And Model MX170

In fact, you'd probably have a hard time convincing Gehl Mix-All owners to even look at anything else. And why should they?

The Mix-All's big 21-inch wide hammermill features 66 reversible thin hammers that cut, rather than pound the feed to deliver a more consistent grind and ensure uniform mixing for a better feed conversion rate.

Gehl's self-contained hydraulic system is designed-in, not added on. It provides the precision of infinitely variable in-feed attachment control to match tractor power for greater grinding capacity. Plus you get fast, smooth, trouble-free unloading with greater reliability.

And a wide variety of options and attachments lets you customize your Mix-All to fit any operation.
