Rural Economy

Cost-efficient Centurydrain™
 roofing and siding is on some of the
 best looking buildings in the country.
 Build with Centurydrain roofing and siding
 and you've built a money-wise structure. Full-
 hard, high tensile galvanized steel, and an
 exclusive drain channel for a dry interior
 give you a building that'll handle years of
 hard duty and hard weather. Good looking, too.
 Crisp lines and plenty of bright, long-lasting
 colors make Wheeling Centurydrain as
 handsome as it is economical.

with MSR-SPF Western Lumber

Quality Trusses Must START with QUALITY LUMBER!

MSR Lumber
 Truss lumber presents unique challenges! We cannot tolerate warp, bow or twist in the chords and maintain absolutely straight roof-lines and flat ceilings.
 Years of selection has shown MSR (Machine-Stress Rated) lumber quite immune to such problems.
 Further selection involves tree-species and growing climate. The close-grain, straight-grain, tiny-knot characteristics of SPF (Spruce-Pine-Fir) grown in the Pacific Northwest has come out best in further immunity - and has become the **Black Bear Standard**. Eastern and southern lumber simply falls short in those essentials.

Laser-Layout
LASER-LAYOUT of each truss on the assembly table verifies alignment and saw-cut of each chord, web and joint - plus size and positioning of each connector plate. At this stage with this lumber, what **LAYS STRAIGHT, STAYS STRAIGHT!**
