

Somerset FFA Holds Parent-Member Banquet

GAY BROWNLEE
Somerset Co. Correspondent
BERLIN (Somerset Co.) —
The Somerset County FFA Association parent and member banquet was attended by 107 persons. Adviser Doyle Paul from the

Brothersvalley Chapter informed the group that county FFA associations, statewide, are very rare. He estimated the total is just two or three, which is why Somerset's FFA county organization deeply appreciates the ongoing support of

its community.

"We are really blessed with cooperating agencies," said Paul. Many awards not presented at the winter FFA convention because of the blizzard were given, including the 1995 Key-

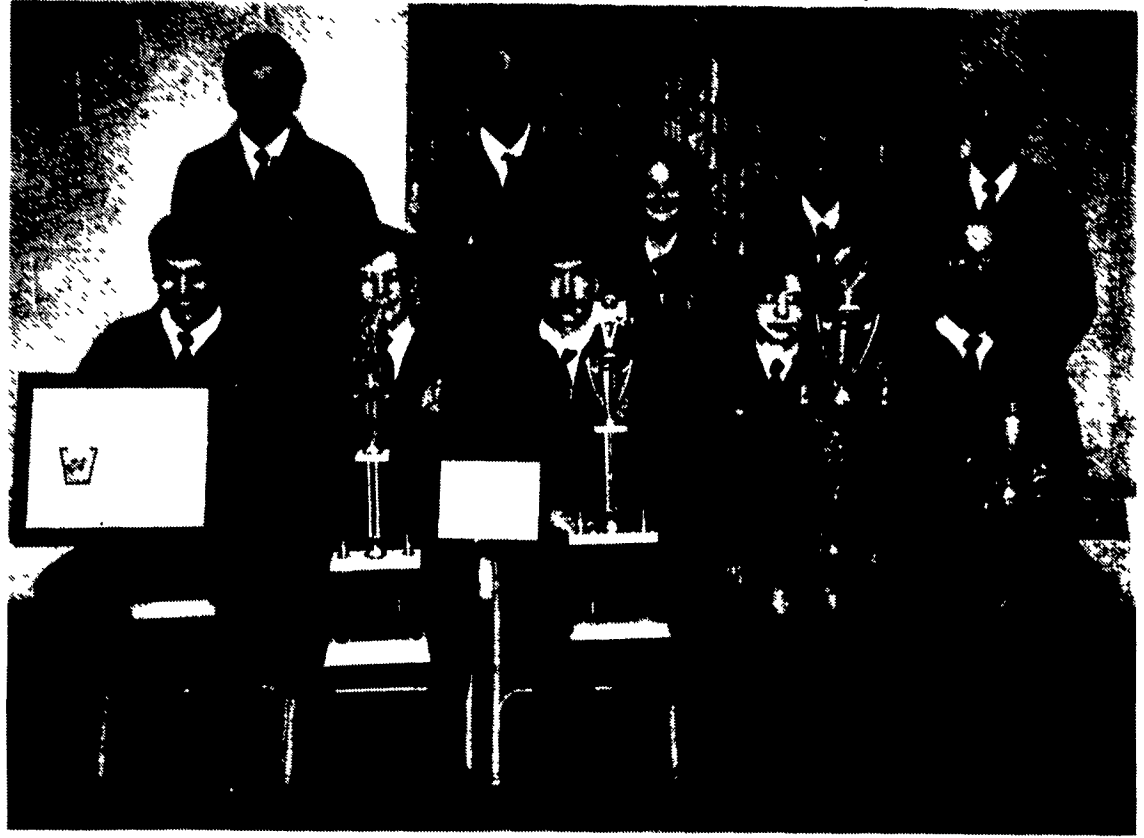

stone degrees. From the Somerset Vo-Tech the recipients were Bob Tannehill, Kevin Spangler, Genette Muro, Dennis Stevanus, Rachael Wright, Sandy King, and Matt Brant. Others from Berlin-Brothersvalley were Matt Cole-

man and Jason Ickes; from Meyersdale: Jeff Knotts and Joshua Winters; and from Somerset: Carey Weigle and Josh Glessner.

Most poignant was the presentation of the National FFA Association (Turn to Page B35)

Jeff Knotts stands affectionately with his mother Elsie Knotts after being her fourth son to receive the FFA Keystone Degree. Mrs. Knotts and her late husband, Don, were presented the National FFA Association Special Citation that was delayed because of bad weather for the state FFA winter convention.

Team winners in the Somerset County FFA Association are, seated from left, Bill Swift, Jonathan Dickey, Justin Miller, Jeannie Ohler, and Bruce Hartman. Standing: Adam Shaffer, Dennis Stevanus, Genette Muro, Rachael Wright, and Josh Koval.

New from — **Great Plains** 12' End Wheel No-Till Drill

No-Till technology and maximum productivity in a 12' size

All of the benefits of Great Plains no-till technology are now available in a new 12 foot size. The new 12' End Wheel No-Till drill is designed to handle the planting needs of small to medium sized operations with maximum productivity. Built to the high quality standards of Great Plains, the 12' End Wheel No-Till drill will plant in the most demanding of no-till conditions with extreme accuracy.

The end wheel design makes this drill extremely maneuverable. Keeping all ground-working components in-line with the end wheels prevents openers from bulldozing or bridging when working in rolling terrain. The end wheels also act as stabilizers to hold the openers steady when seeding on slopes.

Excess debris is no problem for this unit. Opener and coulters stagger of 10 3/4" allows trash to flow evenly and freely. No-till coulters create a mini-seedbed allowing openers to concentrate on seed placement.

Planting depth adjustments are quick and easy with the "T"-handle depth control system. State of the art solid seed tubes ensure that the seed exits the chute with "zero motion drop" for ultimate seed placement accuracy. The optional Seed-Lok™ wheel then presses each seed into moist soil for optimum germination.

The improved straight-arm, solid stand opener design, combined with the cushioned press wheel provides maximum down pressure with less wear and tear.

The large, welded seed box holds up to 2.4 bushels per foot. Exclusive Great Plains fluted feed seed cups coupled with the 4-speed gearbox deliver outstanding accuracy in varying rates and seeding conditions.

Designed with safety in mind, the 12' End Wheel No-Till drill comes equipped with transport safety lights and a wider walkboard.

Accessories available with the 12' End Wheel No-Till drill include: folding markers, coil tine harrows, seed box agitator and small seeds attachment.
