Gehl TMR Mixer Feeders Are #1

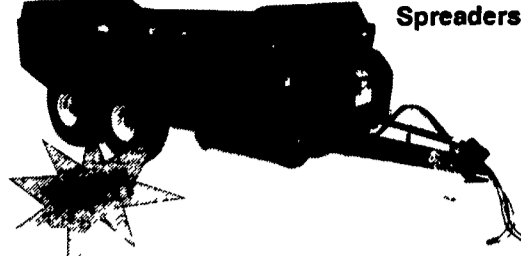

Nothing can maximize the return on investment in your dairy or beef feeding operation like a Total Mixed Ration (TMR) feeding system. And nothing makes TMR work better than a Gehl mixer feeder. Here's why:

- **Better Mixing Action** — Unique four-auger design creates a double figure-8 mixing pattern for fast and complete mixing of all feed ingredients.
- **Energy Efficient** — Planetary drive system requires less horsepower.
- **Built To Last** — Patented star couplers absorb shock loads by allowing the bottom augers to flex, providing long service life.
- **Six Sizes** — From 150 to 500 cubic feet mixing capacities
- **Three Styles** — Trailer type, stationary and truck-mounted units to fit your operation.

GEHL

Scavenger®
Manure
Spreaders

THE BEST JUST GOT BETTER!

Better Performance. Gehl Scavenger®, the original V-tank spreader, has built a well-deserved reputation for delivering unmatched performance in a wide variety of materials. The new Scavenger takes that performance to the next level with even better spreading patterns in the toughest heavily-bedded manures.

Increased Durability. Not only has the new Scavenger been designed to out-perform all other V-tank spreaders, but the main drive system components have been beefed-up for extra durability and increased dependability.

Why is Scavenger the Best? One big reason is the unique new round-core auger. This auger features segmented paddles grouped in a spiral pattern. This fighting configuration delivers more material to the discharge expeller in less time for faster unloading. The paddles are precisely positioned to deliver more uniform feeding to the discharge expeller. This exceptional design breaks up and blends all types of manure.

The auger is hydraulically powered both up and down (unlike competitive units that use springs, gravity or fixed augers). This design provides more control to chop through bridged material or power down through heavy loads.

Outstanding Application Control. Gehl's proven Variflo discharge system has been made even better. It's 33 percent wider on the Model 1315. On all new models the expeller assembly has been significantly strengthened. New square-tooth expeller paddles spread smoothly and evenly. You choose the rate you want, from heavy spring-time spreading to light top-dressing. With Scavenger you have complete control right at your fingertips.

Scavenger is Simply Better. The Gehl Scavenger is a simple spreader. It's solid and durable with sealed, welded tank construction and a full length channel steel sub-frame. Every Scavenger is built to deliver top performance year after year.

Your Gehl Dealer can show you why the new Scavenger V-tank spreader is still the best.
