## The planter you can grow with...

The new **KINZE** Series II Planters introduce an exciting, innovative modular design concept that offers you **total** flexibility in planting options plus the most efficient precision placement planting technology. **Think of the possibilities!** With **KINZE's** Single Frame Planter you can plant 30" corn and minutes later, convert to 15", even 10" row spacing for beans or for small grains. Or, set it up with liquid or dry fertilizer options instead of push units and save the extra trips and expense of other fertilizer application systems. Or, you can add the front-mounted Double Frame® attachment and do it all—standard rows, fertilizer and split rows. All with the same planter, same drive components, same drive system. Without sacrificing one ounce of that quality **KINZE** construction.

**YOU ASKED FOR IT...**

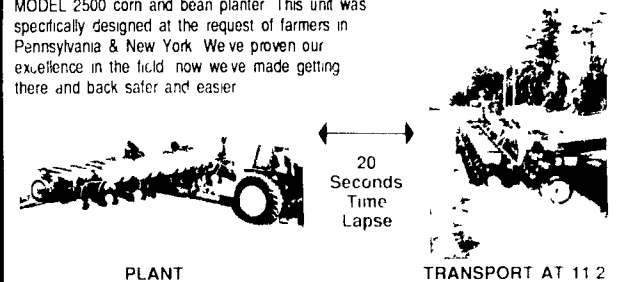

"We really need a six-row planter with a narrow transport width here in the East!"

**WE LISTENED...**

"Safe transportation of wide equipment on narrow roadways is increasingly difficult!"

## KINZE RESPONDED!

**KINZE MFG.** is pleased to announce the **MODEL 2500** corn and bean planter. This unit was specifically designed at the request of farmers in Pennsylvania & New York. We've proven our excellence in the field, now we've made getting there and back safer and easier.
